

G.R. Saunders Elementary School

PO Box 1030, 71 Bridge Avenue
Stellarton, NS B0K 1S0

June 14, 2021

Good Afternoon,

Recently, the Municipality of Pictou County posted on their website that Riverton residents may notice an odor/taste in the drinking water due to a non-harmful naturally occurring compound.

As GR Saunders is in the area impacted by the unpleasant water odor and taste, we will be providing drinking water from water coolers for students to fill their water bottles for the day. Please know, the water at the school is not-harmful, however we are putting the water coolers in place due to the aesthetics of the water for drinking only.

If you have any questions, please reach out to the school.

Thank you!

Erin Cormier
